BOUYGUES ENERGIES & SERVICES ACQUIRES SEA PRODUCTIQUE TO STRENGTHEN ITS EXPERTISE IN INDUSTRY 4.0

Bouygues Energies & Services is pleased to announce the acquisition of SEA PRODUCTIQUE, a well-known integrator of robotics, automation and industrial IT solutions. This acquisition demonstrates the ambition of Bouygues Energies & Services in the Industry 4.0 market.

Industry 4.0 is seen as a priority for strategic development that helps manufacturers to improve the performance of their sites and processes. Thanks to SEA PRODUCTIQUE, Bouygues Energies & Service will be strengthening its expertise in automation. 80 employees – sales staff, engineers and technicians – have joined its teams, working in four design offices: automation/robotics, industrial IT, mechanical engineering and electrical engineering.

With SEA PRODUCTIQUE, Bouygues Energies & Services is supplementing its global offer, from engineering to maintenance (engineering design, industrial works, automation, industrial transfer and industrial maintenance) and expanding its territorial coverage in France with new customers and partners.

Based in Nantes ever since its creation in 1991 by Daniel Durand, director and shareholder, SEA PRODUCTIQUE has developed a diversified portfolio of around 350 projects per year throughout France in key sectors such as the agri-food, manufacturing and pharmaceutical industries. In 2019, SEA PRODUCTIQUE generated revenues of €16.8 m.

SEA PRODUCTIQUE will form part of the Energy and Industry division of Bouygues Energies & Services and will be incorporated into its Automation business unit. This business unit now employs more than 160 specialists in the areas of automation, industrial IT and robotics.

About Bouygues Energies & Services:

Bouygues Construction's Energies & Services division is a leading player in digital and energy transformation solutions for regions, industries and buildings, it is an essential growth driver for Bouygues Construction. With over 21,000 employees, the Energies & Services division operates primarily in Germany, Canada, France, the United Kingdom, Italy and Switzerland, while also carrying out missions for customers in Africa, Asia and Oceania.

The development of regions, industries and services depends on the ability to guarantee optimal flows of energy, data, services and people. This is why Bouygues Energies & Services designs, builds and operates solutions for the production, distribution and operation of the energy of the future, while supporting the digitalisation and development of innovative services for local residents, industry and service sector users. The Energy & Services division accounts for a third of Bouygues Construction's business.
